Emulation

Emulators and Roms

Emulators

You can find a list of emulators here https://emulation.gametechwiki.com/index.php/Main_Page

Roms

There are a variety of places you can find ROMS. Personally the r/roms megathread is the place to go. Anything that is "no-intro" or "redump" has been verified by the community to be a good dump.

Frequently asked questions (by a helper or helpee)

What is your PC specs?

1. What is your CPU?

2. What is **your** GPU?
   - Windows
     - Open task manager
     - "Performance" tab
     - "GPU" on the left
   - Linux
     - ???
   - MacOS
     - ???

3. What is **a** GPU?
