Contributing Information

You can help populate this wiki with information by the following methods

- Creating a profile via the OAuth logins and making a comment
OR
- Creating a profile via the OAuth logins and providing me with "credentials"
 - Credentials may include
 - Github links
 - Blog posts
 - Previous Interactions with you
 - Joining the Discord server (<https://discord.gg/gb3aHdp58q>) and Providing us (the wiki Admins) with credentials will elevate you to "Editor" role so you can make books, pages, and basically everything except Administration

Posting Rules

1. No direct links to pirated content. You may provide steps on how to use software to pirate but no *actual* pirated content.
 - This includes
 - pastebins
 - Piracy sites (like vimms)
 - Or just attaching pirated files
 - **YOU CAN**
 - Link to archival pages, like archive.org
 - the-eye.eu in my eyes, even though it is classed as an archival site, is in a grey area so I am banning links to it
2. No passwords, keys, or cracks to get pirated content running.
3. Use common sense
 - No bad words
 - English language
 - Be nice
 - etc
4. No NSFW content, at all, not even vaguely lewd, come on.

The Goal of this "Wiki"

This is primarily a wiki for me to populate with all sorts of information and guides, from piracy to programming, cooking to [insert topic here].

It is here so I don't forget things and/or can learn new things but it is open to the public so they can also use it.

We now have a Discord Server: <https://discord.gg/gb3aHdp58q>
