Master tool list

WiiU Tools

Dumping

- WUDumper
- disc2app
- ftpiiu (ftpiiu_everywhere)

PC Tools

NUS Downloaders

- USBHelper + USBHelperLauncher (Recommended for newbies)
  - Pros:
    - Has a nice GUI
    - Easy to use for those who aren't skilled with the command line
  - Cons:
    - Can have issues on *some* systems due to weird Windows bugs
- FunkiiU
  - Current guide is offsite >

    https://gist.github.com/Irastris/31766414a981a056d49c1242a019829a
  - Python 3.x
  - Will be forking it to this wiki in due time
  - Pros
    - Cross Platform
  - Cons
    - Command Line (Unless you use FunkiiUI)
- JNUSTool

  - https://github.com/Maschell/JNUSTool/releases/latest
  - Java
  - Cross Platform

- Pros
  - Good for Cemu
- Cons
  - A bit too fast for it own good, can mess up so you need to run it multiple times
  - Command Line

Format Converters

- JWUDTool
- JNUSLibDecryptor
